

LIVING WITH LANDSLIDES

What is a landslide?

What are the impacts?

A landslide is a downslope movement of soil

Landslides cause poverty and loss of lives, crops and property

What can you do?

Recognize and report early warning signs, like cracks, bending trees and standing water

Plant trees and stop deforestation

Improve house construction, like back sloping of earth wall, leaving 3m between earth wall and house, and avoid water accumulation

Help each other

Art work by Asaph Batecereza

This poster was developed based on the results of the AfReSlide research project 'Landslides in Equatorial Africa: Identifying culturally, technically and economically feasible resilience strategies', and benefited from the financial support of the Belgian Science Policy BELSPO and the Flemish Inter-University Council VLIR UOS.
